Instructions for reading the 2001-2002 Student Migration Report

The 2001-2002 Student Migration Report compares fall 2001 enrollment in Texas public community and technical colleges to fall 2002 enrollment at these institutions. The data are taken from the CBM001 Student Report, which records students enrolled on the official census date (12 th class day) in semester-length courses and the CBM009 Graduation Report, which records graduates for the academic year.

For this migration report, students were tracked using their student identification numbers. This study does not include students enrolled in the spring 2002 or summer 2002 semesters or students enrolled in flexible entry courses. The data also do not include students enrolled at private institutions.

A detailed student migration report specific to your institution can be produced upon request, but will take additional time. Requests for a detailed student migration report or questions about the report should be directed to David Gill at david.gill@thecb.state.tx.us or 512/427-6233.

The 2001-2002 Student Migration Report data are separated by graduates and non-graduates. Graduates include students reported on the CBM009 for 2001-2002 the academic year. Graduates include students who graduated at any time during the 2001-2002 academic year.

The 2000-2001 Student Migration Report data are further categorized in five major ways:

- a. SAME INSTITUTION Students who were enrolled in the 2001 fall term at a public community or technical college and who returned to the same institution in the fall of 2002.
- b. OTHER JR Students who enrolled in the 2001 fall term at a public community or technical college and transferred to another public community or technical college in the fall of 2002.
- c. OTHER SR Students who enrolled in the 2001 fall term at a public community or technical college and transferred to a public senior college or university in the fall of 2002.
- d. CONCURRENT ENROLLMENT Students enrolled in the fall 2001 term at a public community or technical college and subsequently enrolled in two or more postsecondary institutions (a public community college or technical college and/or senior institution) in the 2002 fall term, neither of which was the original fall 2001 institution.
- e. CANNOT LOCATE Students who enrolled in the fall 2001 term at a public community or technical college and who could not be identified through the Coordinating Board student record files in the fall of 2002.

Below the aggregate totals for each institution is an additional category, SAME INST. AND CONCURRENT. Students in this category are those who returned to the same institution in fall 2002 and were concurrently enrolled at another institution in the fall of 2002. These students were included in the category SAME INSTITUTION.

LIMITATIONS

The data used in the 2001-2002 Student Migration Report is submitted to the Coordinating Board by the institutions. The institutions certify the data as being correct.

Some institutions inaccurately report students who fall into the VOCATIONAL-TECHNICAL category as academic students. Therefore, the ACADEMIC category may contain vocational-technical students who were not reported in the VOCATIONAL- TECHNICAL category by their institutions.

The numbers in the undeclared category represent students who may ultimately declare either an academic or vocational-technical intent.

The current reporting system does not track students who transferred to private colleges, enrolled in colleges out of state, or entered the workforce.
